In broad spectrum fungal infections,

^{Rx} Flucosyn-400

Fluconazole Tablets I.P. 400mg

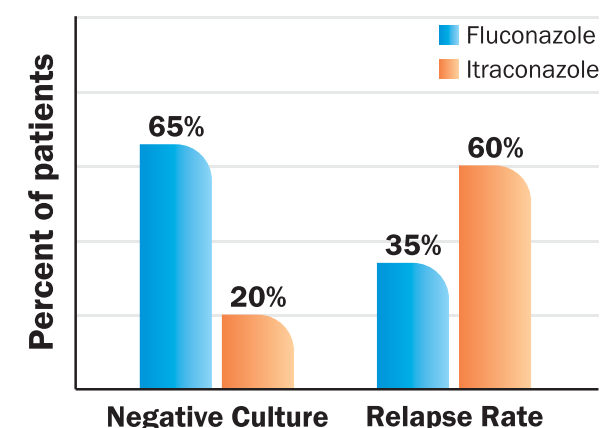

The power packed antifungal

Increased survival rate of patients¹ –

High dose fluconazole (400mg) resulted in 90% survival rates of patients in Candida infection

Superior efficacy to itraconazole² –

Higher eradication and lower relapse rates seen in fluconazole

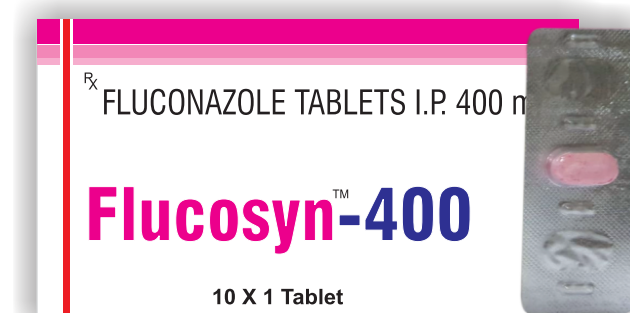

In pityriasis versicolor, superior improvement with 400mg fluconazole over itraconazole was seen.

For systemic Candida infections including –

- Candidemia,
- Disseminated Candidiasis
- Pneumonia

Also, indicated in blastomycosis
