

In the treatment of acid peptic disorders...

^{Rx} **Rabecar[®] 20**

Rabeprazole Sodium IP 20mg

Perfect partner in maintaining APD

Rabeprazole has:

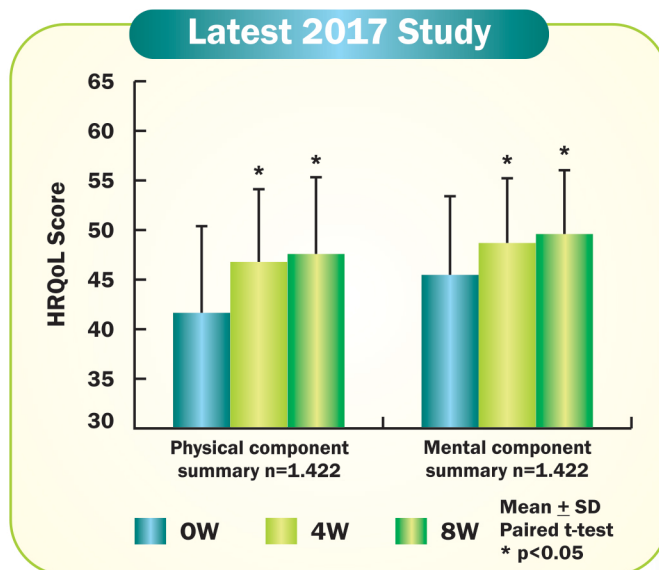

- Faster onset of action - Within 1 hr¹
- Faster rate of duodenal ulcer healing compared to ranitidine²

Superiority over Pantoprazole³

- Better control over Nocturnal Acid Output and Intra-gastric Acidity
- Maintains a significantly greater intra-gastric pH over the first 8.33 hours

In patients with Refractory Reflux Oesophagitis⁴

Significantly better symptom control and improves Health related QoL

Once daily dosage

In,

- **Hyperacidity**
- **Gastritis**
- **GERD**
- **Peptic ulcers**
