

For topclass and economical  
antifungal activity

# <sup>Rx</sup> Tinapax<sup>®</sup> Tablets

Terbinafine Hydrochloride 250mg tablets

## Terbinafine

- Orally and topically active antimycotic agent<sup>1</sup>
- Excellent fungicidal activity against the dermatophytes and variable activity against yeasts and non-dermatophyte molds
- Treatment of choice for dermatophyte onychomycosis<sup>2</sup>

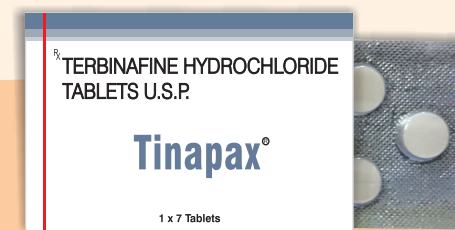

## DOCTOR'S CHOICE IN 2017:

50 doctors involving 440 patients completed survey on 500mg daily terbinafine.

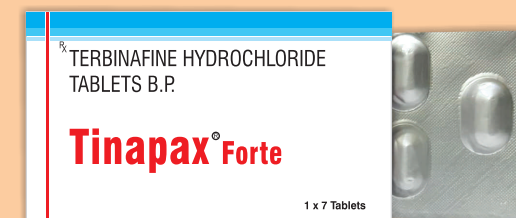

As per doctors' opinion, with 4 weeks of treatment in dermatophytosis, 92% of the patients showed very good response

**Dosage : 250mg once daily**
